Curriculum Mapping 101: Understanding the Path to Student Learning in Your Program

**Thursday, March 5, 2009
12:15 pm – 1:15 pm in CTE
University Hall 3030**

Curriculum maps are one of the simplest yet most essential tools in the process of understanding the factors that contribute to student learning in your program. This workshop will help you get started on your program's curriculum map by providing a map template and approaches to completing it. You will also be given time to begin a curriculum map for your program.

Attendees should bring their program's learning outcomes and curriculum. Curriculum mapping is more effective (and more fun) when worked on with a partner or a small committee. For this reason we encourage more than one person to come from each program.

**Lunch will be included, please RSVP to
teachers@lmu.edu or Ext.85866
