SoTL Showcase Week 2008
Monday, September 29 at Noon
University Hall 3030
Keynote Speaker:
Randall Bass, Ph.D.,
Georgetown University
Associate Professor, English Department,
Assistant Provost, Teaching and Learning Initiatives

Dr. Bass has directed a number of electronic projects and has published on the use of technology in teaching culture and history, including the $2.6 million Visible Knowledge Project exploring the impact of technology on learning in the humanities.

“Encouraging Learning through the Scholarship of Teaching and Learning”

One of the consequences of the ‘learning paradigm’ has been to unleash an expanded view of learning far broader and more complicated than higher education is prepared to recognize. Much of this learning is elusive, if not invisible, in traditional assessments. This session will explore how faculty inquiry activity like the scholarship of teaching and learning can enhance our ability to recognize and respond to learning that is too often invisible or undervalued in higher education and to rethink some of our biases about knowledge and expertise in the curriculum.

Monday, September 29 from 3pm – 5pm
Marymount Institute Lounge and 3rd Floor Skyway
CTE’s 10th Anniversary Celebration & Poster session #1:
SoTL projects by LMU Faculty and Summer Assessment Workshop assessment plans

Lunch and refreshments will be included, please RSVP to teachers@lmu.edu or Ext.85866
