SERS: Why I Do Physics Education Research

Presented by:
Vince Coletta, Ph.D., Physics Department
Loyola Marymount University

Monday, January 23, 2012 | 12:00 PM to 1:00 PM | UNH 3030

In this seminar I will share experiences that have motivated my research in physics education. I will describe the initial research question that arose out of my teaching and how the answer to that question led to other intriguing questions that continue to motivate me today. Can we develop a students’ ability to reason? Can we change a student’s understanding of what it means to learn? In what way does gender affect a student’s work?
